Door preparation

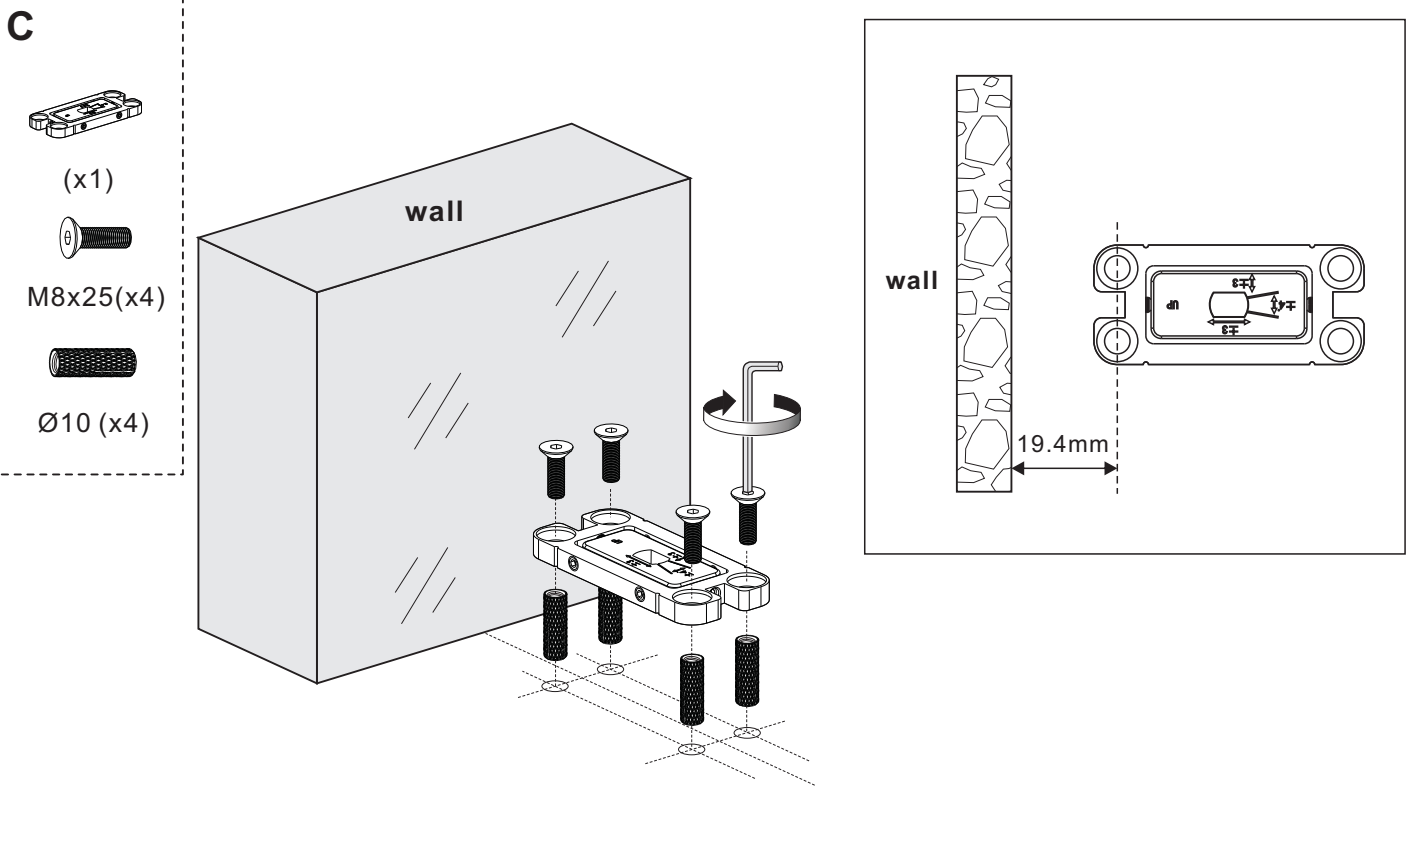

Installation

1 Mounting Plate Drilling Hole Size.

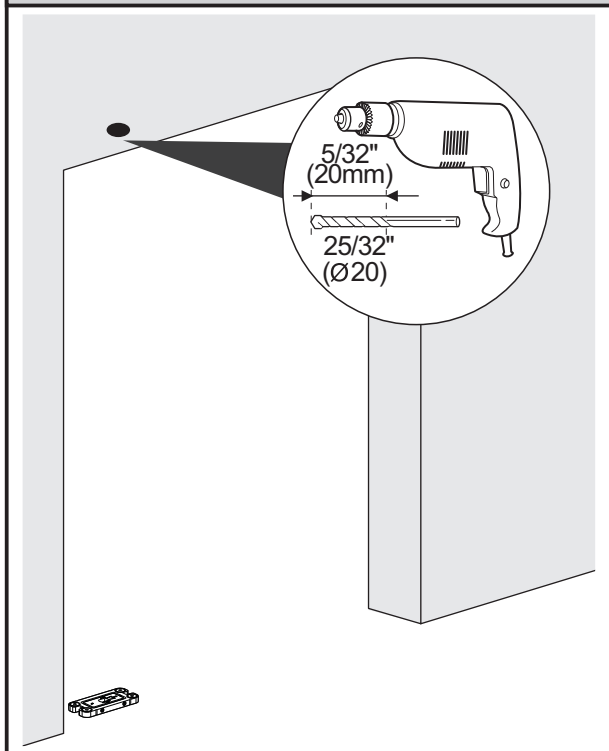

2 Insert screws after drilling the mounting plate. Then fix mounting plate well.

3 Mark the hole position by pencil.

4 Drill holes.

5 Fixing top pivot plate.

6 Loosen the screws to make pin retract.

7 Fasten the screws to make pin pot out inside the top pivot.

8 Adjust positioning of the door.

9 Adjust the buffer speed.

Adjust the buffer speed between the first and second speed. Adjust the first speed, then adjust the second speed till door works smoothly. It is a best way to adjust speed to turn speed valves 1/4 circle every time.

Hold open at 90 or no hold open

10 Put on stainless steel covers.

C

(x1)

11 Mount a handle.

D

(x1)
